- MO 2020 Rural Health Clinics
- MO 2020 Federally Qualified Health Centers
- MO 2020 Local Public Health Agencies
- MO 2020 Local Public Health Agency Districts
- MO 2020 Hospitals

MSDIS General News

Thanks to the hard work of our colleagues at DoIT, all MSDIS assets should now have HTTPS enabled. This change has been implemented in response to ESRI (and Open Data, in particular) no longer supporting unsecured links. We are still in the testing phases, but this should also enable MSDIS services to work with Tableau.

It is with a tremendous amount of sadness that we must report the departure of MSDIS workstudy student Ben Kite. Ben came to us a few years ago from Laura Estabrooks' lab and was an immediate help with many behind-the-scenes issues that most of you were never aware of. He built test applications and story maps, helped organize our data, and was essential in testing changes to server configurations. Managing MSDIS without Ben would have been a much more difficult task and, while we wish him the very best, we will miss his assistance.

MSDIS Downtime

MSDIS was knocked offline on the morning of 22 October 2020 as a consequence of a much larger Mizzou campus network outage. The site, which was working perfectly fine at 5:00 AM, fell victim to the outage at around 6:00 AM and was down until approximately 10:15 AM. In an odd twist of fate that could only have happened during the calamity that is 2020, because the outage was so comprehensive, the only way we were able to keep users updated on the status of the problem was by working from home.
