## **MSDIS General News**

After a very busy first half of 2022, we finally found some time to download and deploy the 2021 TIGER/Line data for Missouri. As with last year's deployment, we have divided the files in between statewide and county-level directories. Additionally, owing to the fact that the TIGER/Line metadata are still not natively compatible with ESRI platforms, we will continue to restrict deployment of these new Census data to the MSDIS file server only. The data are still perfectly useable in all other aspects and represent valuable resources to Missouri's GIS community.

## **MSDIS Downtime**

No outages were reported during June 2022.
